Search For Compute Engine/instance

The screenshot shows the Google Skills catalog interface. The browser address bar displays the URL: `skills.google/catalog?keywords=compute+instances&locale=`. The page header includes the Google Skills logo, a search bar with the text "What do you want to learn today?", and a "Join" button. The main heading is "Explore training your way", followed by a subtext: "Your home for building AI skills and more. Get hands on with Google Skills Labs, dive into in-depth courses, and learn directly from the experts. When ready, prove your new skills with career-boosting credentials." Below this, a search bar contains the text "compute instances". To the right of the search bar are filters for "Credential", "Format", "Level", "Language", and "Duration". Below the filters, it says "16 results". Four training cards are displayed, each labeled "Lab":

- Deploy a Compute Instance with a Remote Startup Script: Challenge...**
Configure a Linux Google Compute Engine instance that installs an Apache web server software using a remote...
- Terraform Essentials: Google Compute Engine Instance**
Arcade Lab: Gemini Generative AI Tasks to learn Google Cloud.
- Compute Engine: Qwik Start - Windows**
Google Compute Engine lets you create and run virtual machines on Google infrastructure. In this lab you create a...
- Monitor an Apache Web Server using Ops Agent**
Learn how to monitor an Apache Web Server installed on a Compute Engine virtual machine (VM) instance using Op...

The Windows taskbar is visible at the bottom, showing the search bar and various application icons.

Open Catalog In Google skills

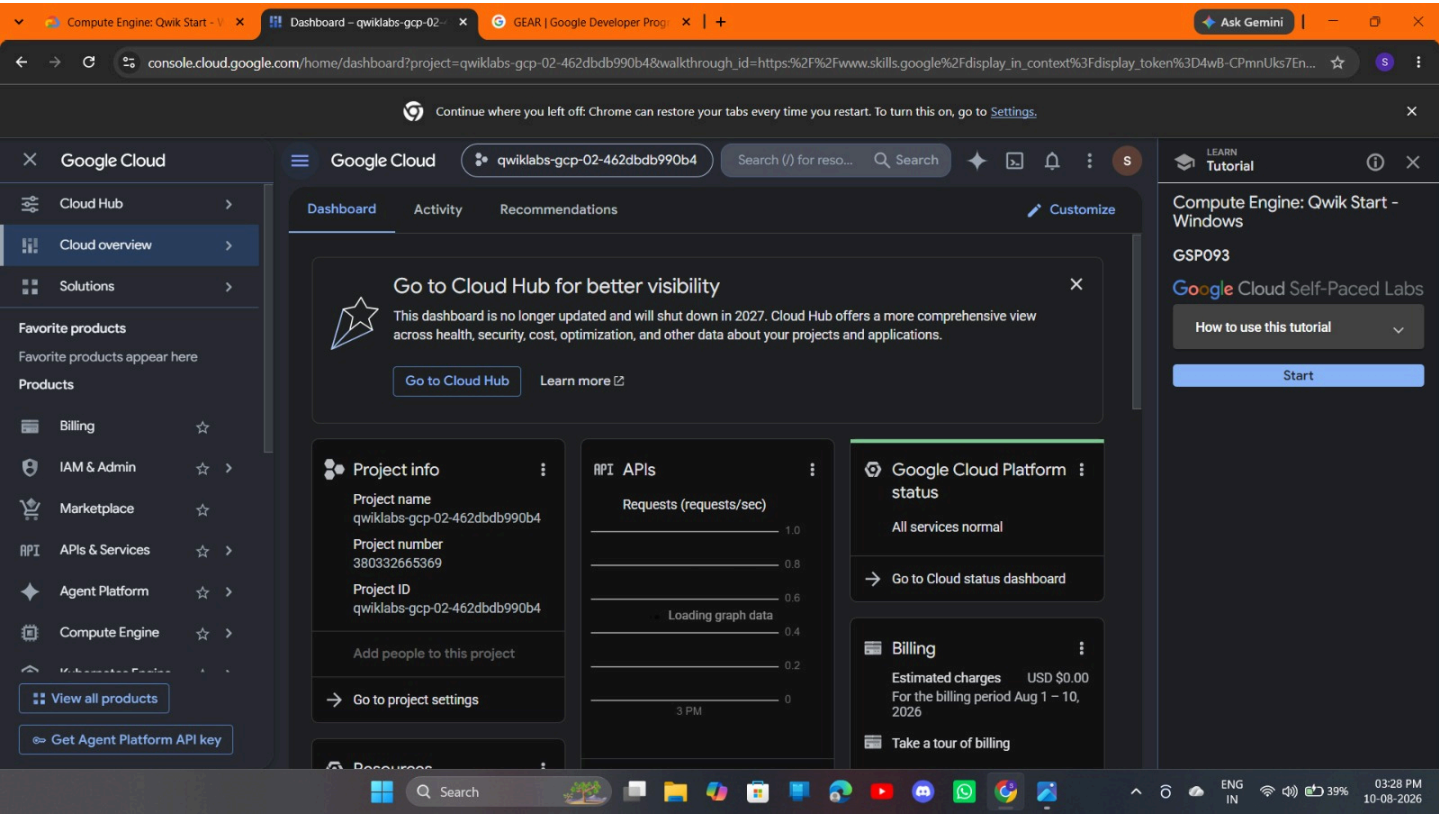

The screenshot shows the Google Skills catalog page for the "Compute Engine: Qwik Start - Windows" lab. The browser address bar displays the URL: `skills.google/fociuses/560?catalog_rank=%7B"rank"%3A3%2C"num_filters"%3A0%2C"has_search"%3Atrue%7D&parent=catalog&search_id=95917594`. The page header includes the Google Skills logo, a search bar with the text "What do you want to learn today?", and a "Join" button. The main heading is "Compute Engine: Qwik Start - Windows". Below the heading, it says "1 Credit", "15 minutes", "Introductory", "Updated about 1 month ago", and "ID: GSP093". A green "Start" button is visible. Below the button, there is a dropdown menu showing "GSP093". A notification banner at the bottom states: "This lab may incorporate AI tools to support your learning." The Windows taskbar is visible at the bottom, showing the search bar and various application icons.

Open Cloud Console in New tab

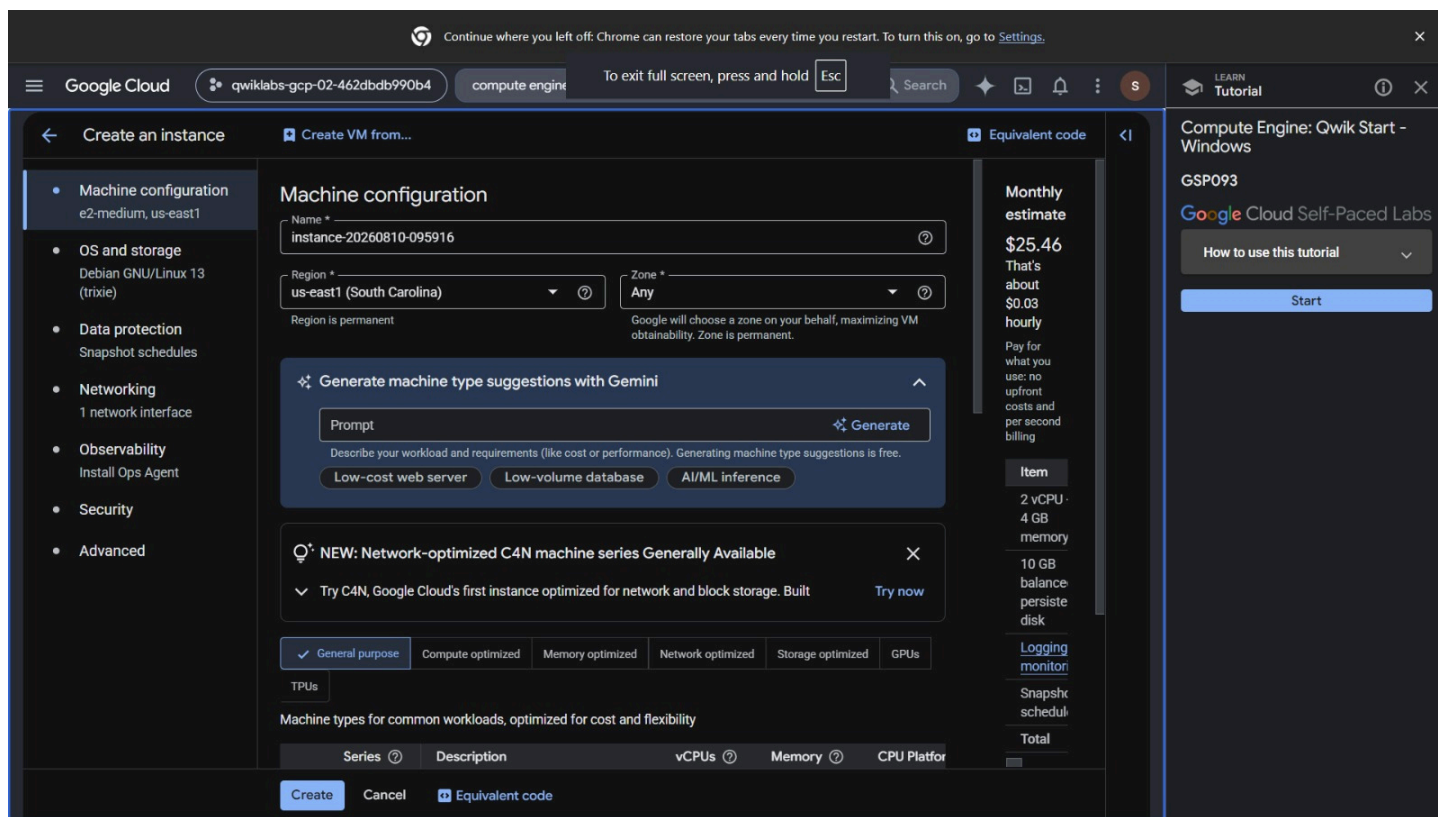

•

Search compute engine

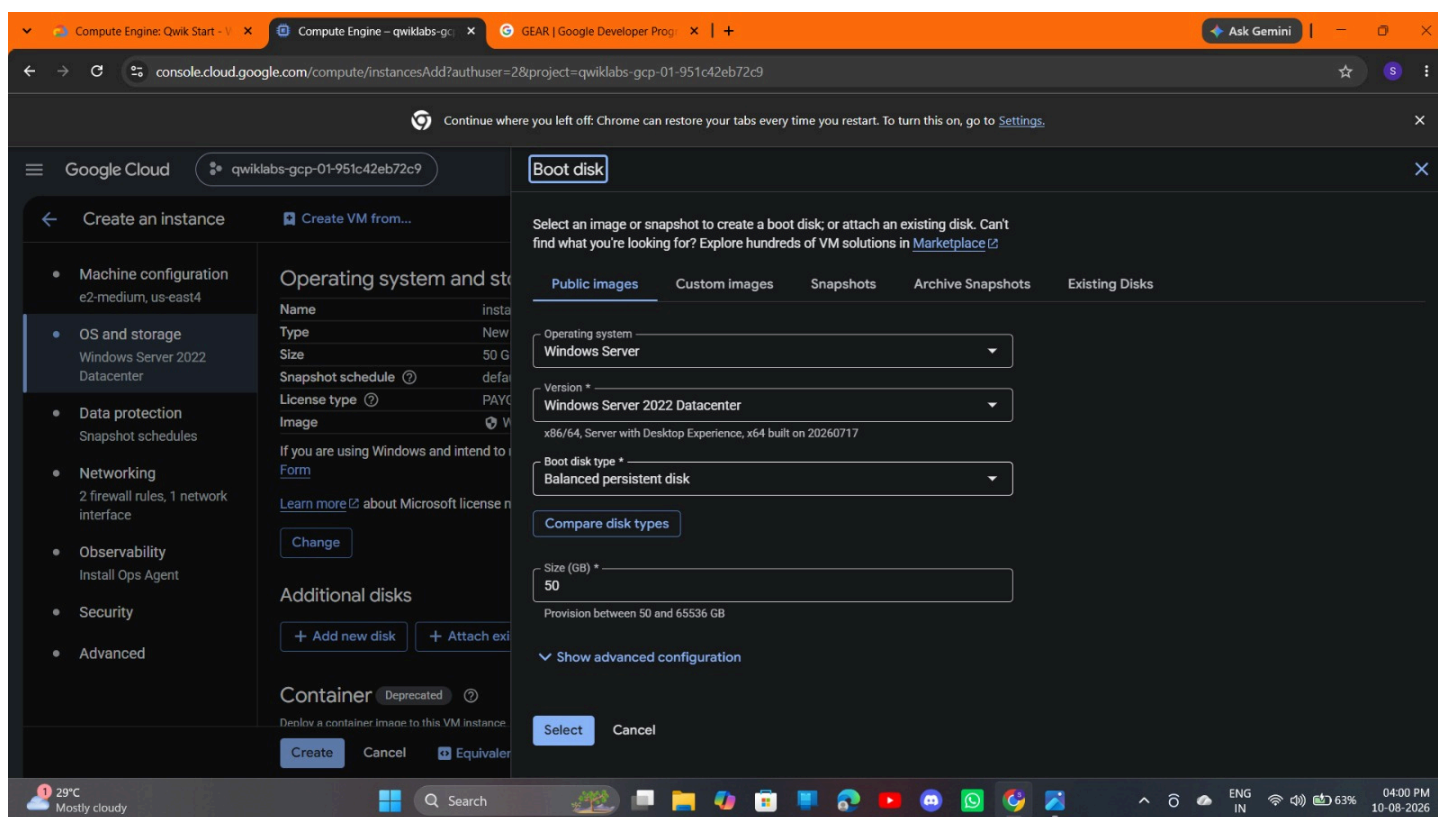

Click Create instance

Choose Windows server and Click Create

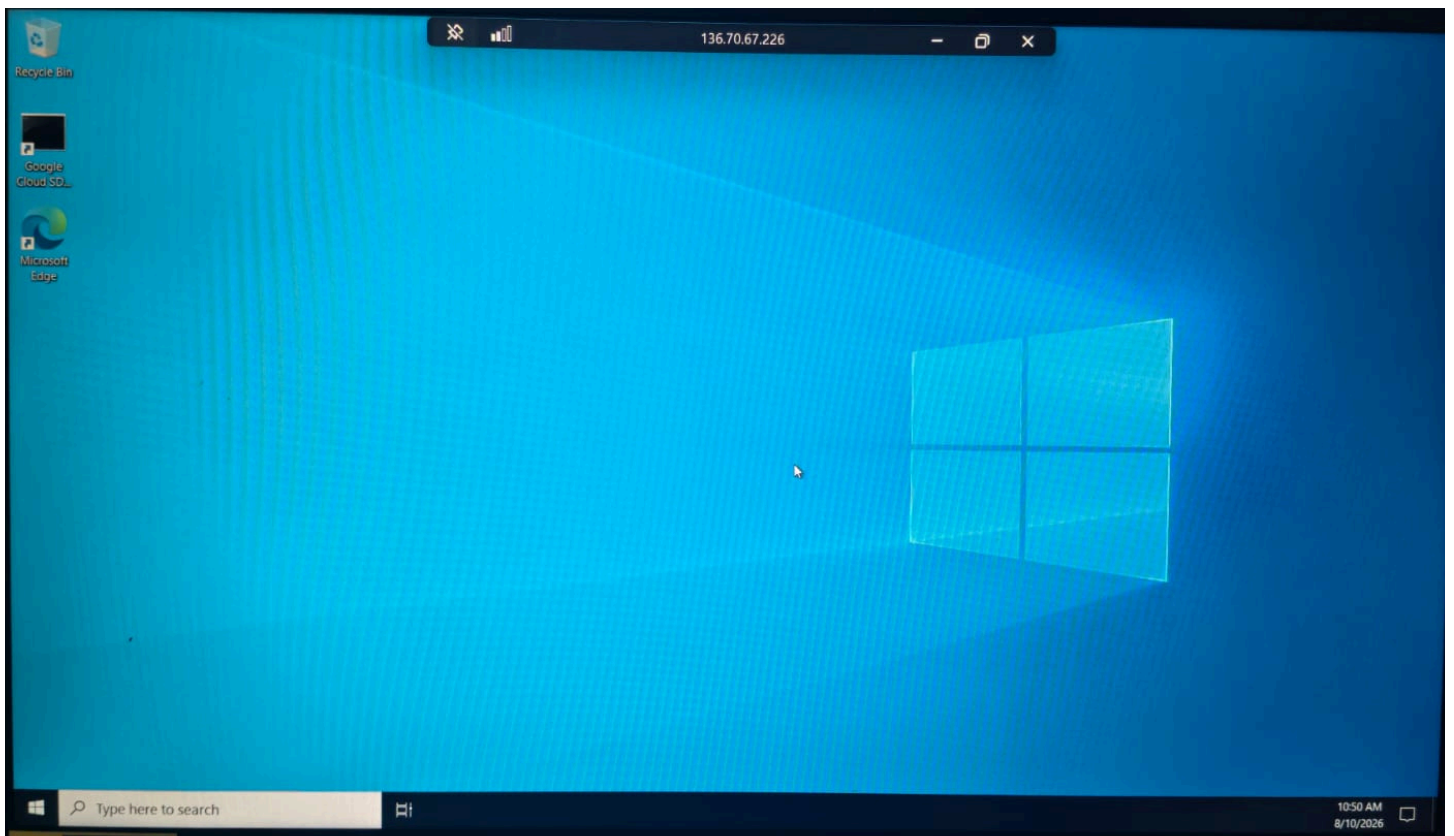

Google Cloud console showing VM instances. A "Remote Desktop Connection" dialog is open, displaying the computer name "136.70.67.226" and user name "student_01_42fa6151e". A warning message states: "Container startup agent deprecated. Support for the container startup agent will be removed in a future release. Workloads will continue to run, but Google will no longer provide support. To ensure reliability, migrate to an alternative solution. Learn more". A table lists VM instances:

Instance Name	Zone	Recommendations	In use by	Internal IP	External IP	Connect
instance-20260810-	us-east4-c			10.150.0.2 (nic0)	136.70.67.226 (nic0)	RDP

Related actions include: Set Windows password, View gcloud command to reset password, Download the RDP file, and Learn about Windows auth.

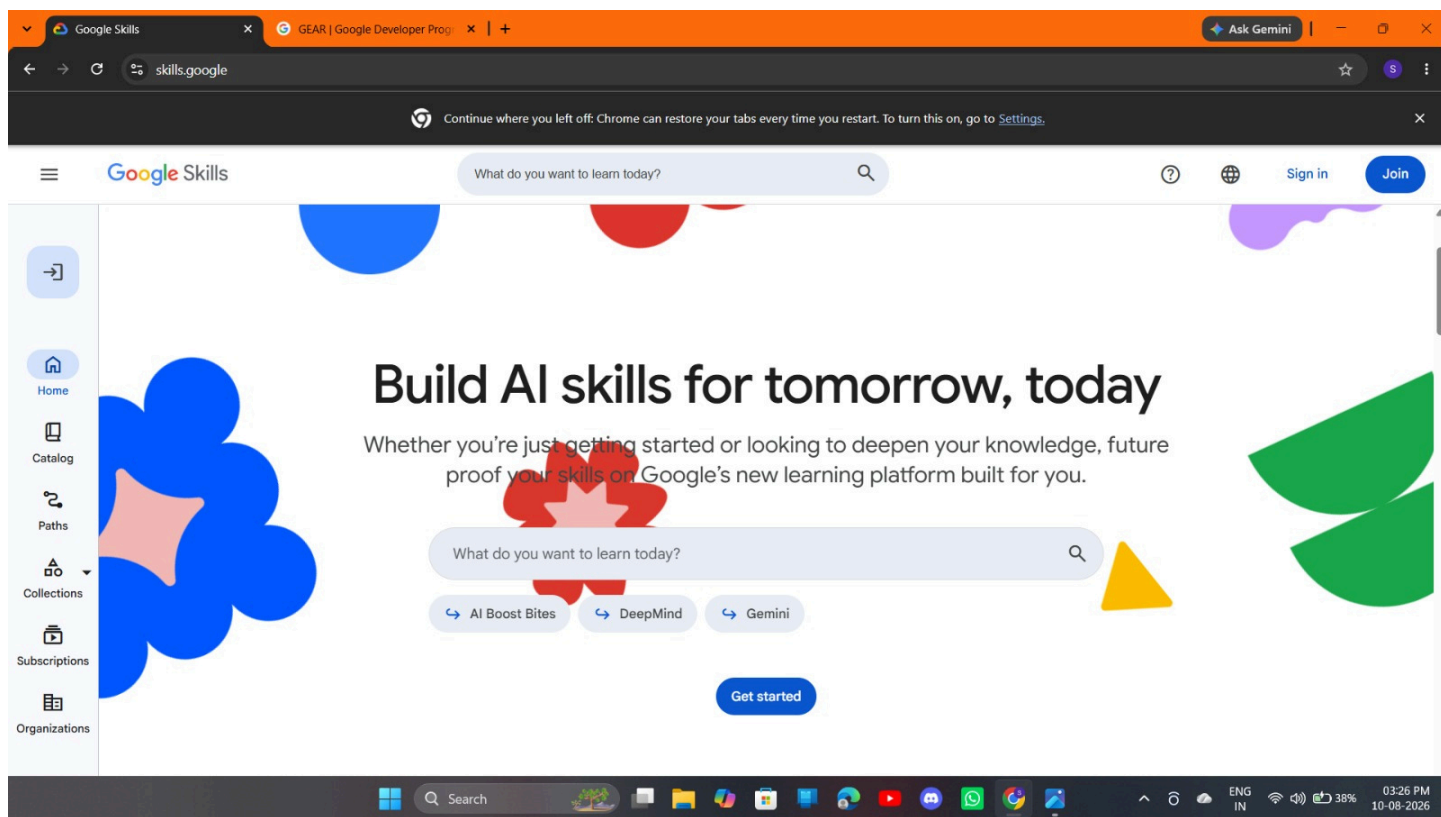

Google Cloud console showing VM instances. A "Remote Desktop Connection" dialog is open, displaying the computer name "136.70.67.226" and user name "student_01_42fa6151e". A warning message states: "The identity of the remote computer cannot be verified. Do you want to connect anyway?". The dialog also displays certificate errors: "The remote computer could not be authenticated due to problems with its security certificate. It may be unsafe to proceed." and "The certificate is not from a trusted certifying authority." The user is prompted to "View certificate..." or "Yes/No".

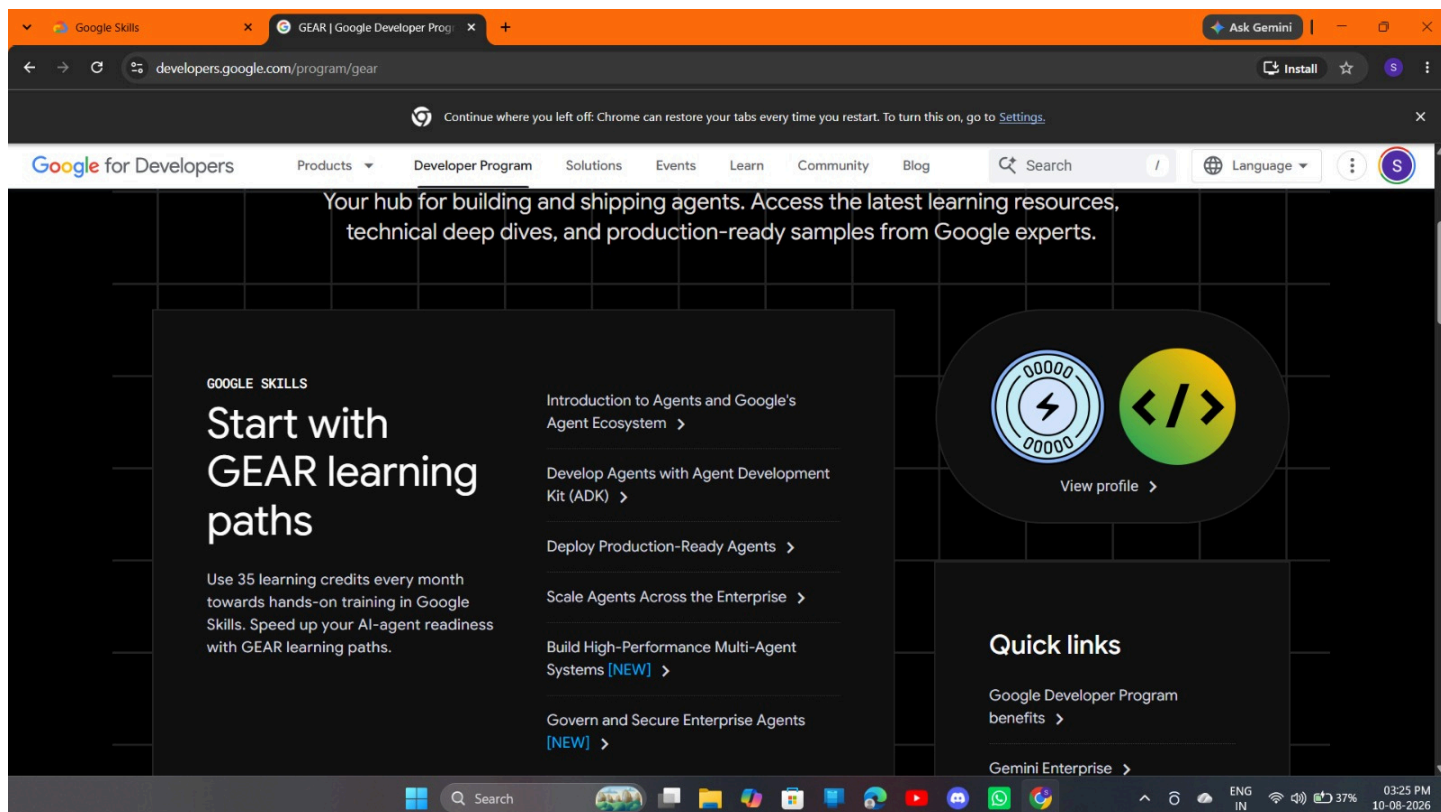

VM is Created Using windows Server.

Select Debian Server & Create

Google Cloud console - Create an instance page. The 'Operating system and storage' tab is selected. The configuration shows:

- Operating system: Debian
- Version: Debian GNU/Linux 13 (trixie)
- Boot disk type: Balanced persistent disk
- Size (GB): 10

The 'Create' button is visible at the bottom of the configuration panel.

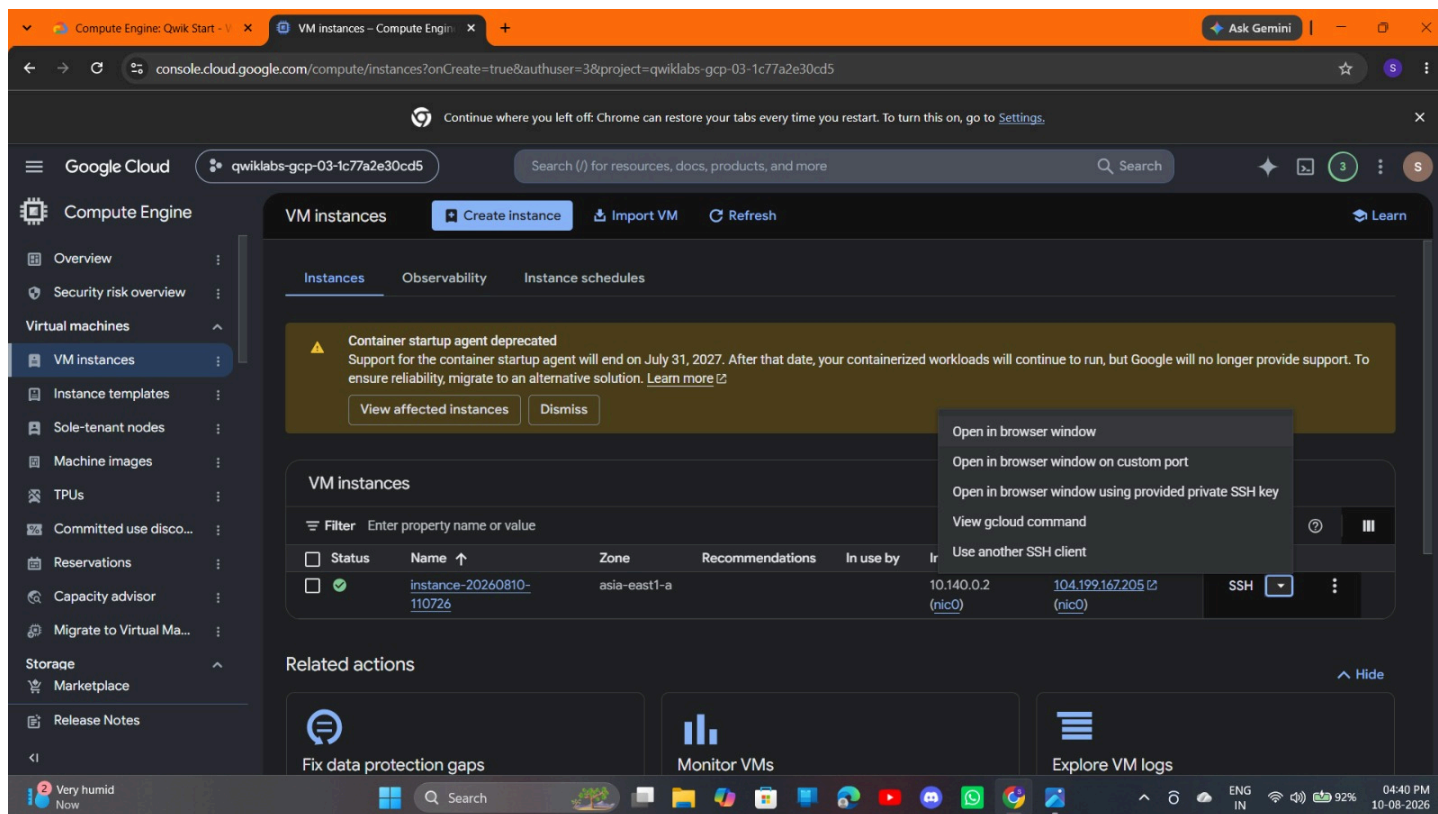

Google Cloud console - VM instances page. A warning banner at the top states: "Container startup agent deprecated. Support for the container startup agent will end on July 31, 2027. After that date, your containerized workloads will continue to run, but Google will no longer provide support. To ensure reliability, migrate to an alternative solution. [Learn more](#)".

Below the warning, the 'VM instances' section displays a table of instances:

Status	Name	Zone	Recommendations	In use by	Internal IP	External IP	Connect
☒	instance-20260810-110726	asia-east1-a			10.140.0.2 (nic0)	104.199.167.205 (nic0)	SSH

Related actions at the bottom include: Fix data protection gaps, Monitor VMs, and Explore VM logs.

Click SSH and Open in browser Window

The screenshot shows the Google Cloud console's 'VM instances' page. A warning banner at the top states: 'Container startup agent deprecated. Support for the container startup agent will end on July 31, 2027. After that date, your containerized workloads will continue to run, but Google will no longer provide support. To ensure reliability, migrate to an alternative solution. [Learn more](#)'.

The 'VM instances' table lists one instance:

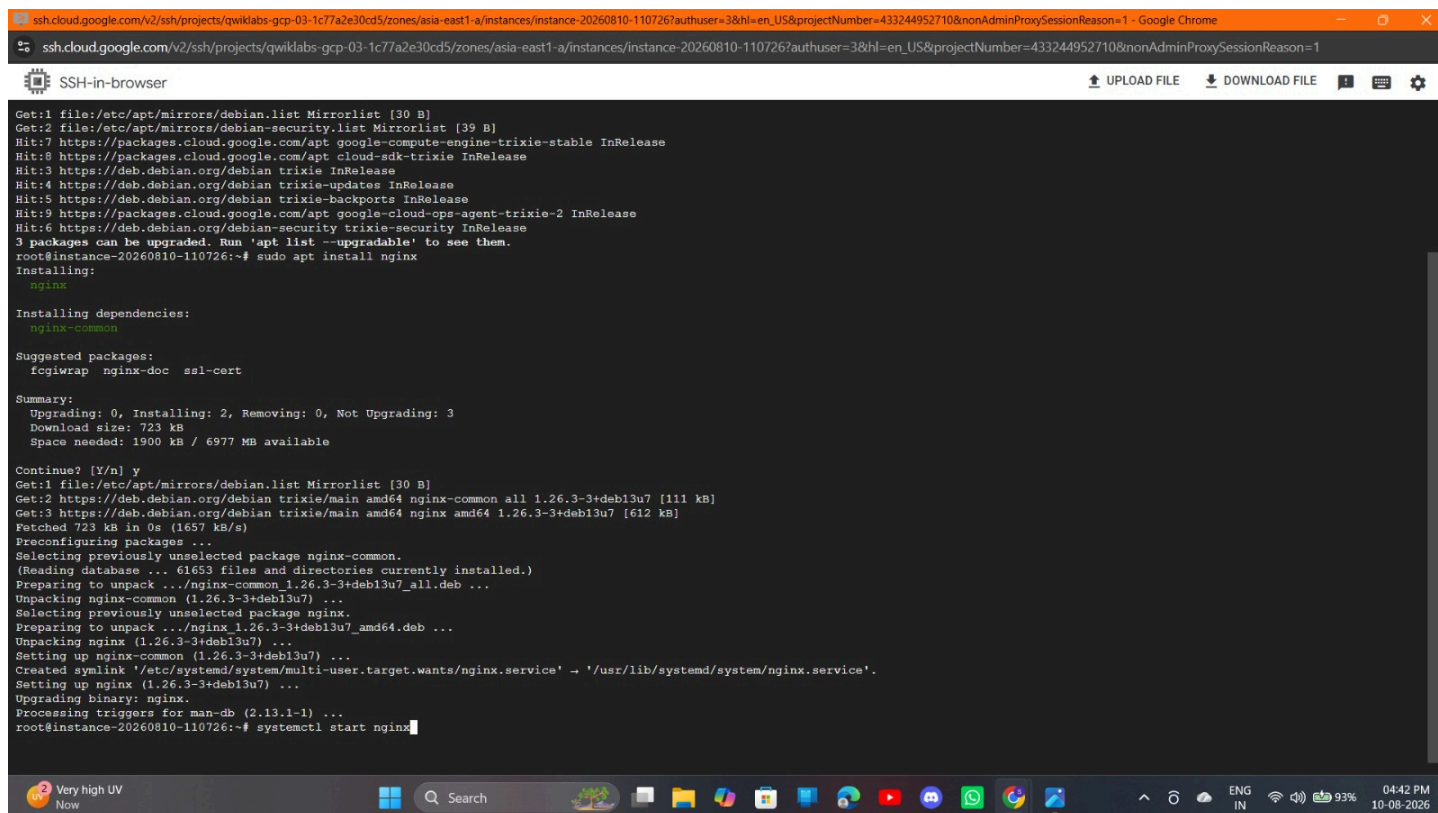

Status	Name	Zone	Recommendations	In use by	IP address	SSH
✓	instance-20260810-110726	asia-east1-a			10.140.0.2 (nic0) / 104.199.167.205 (nic0)	SSH

A context menu is open over the 'SSH' button, showing the following options:

- Open in browser window
- Open in browser window on custom port
- Open in browser window using provided private SSH key
- View gcloud command
- Use another SSH client

Below the table, there are 'Related actions' cards for 'Fix data protection gaps', 'Monitor VMs', and 'Explore VM logs'.

Execute Commands and run nginx

The screenshot shows an SSH session in a browser window. The terminal output is as follows:

```
